

University of Gour Banga

Curriculum Of Education (Major and Minor)

As Per

National Education Policy -2020

For Fulfillment of –

- 1 Year Undergraduate Certificate Course (*1st and 2nd Semester*)
- 2 Years Undergraduate Diploma Course (*3rd and 4th Semester*)

Semester – I

Syllabus

Education

(MAJOR COURSE)

EDCMJ 1: Educational Philosophy

Course Objectives

At the end of the course, a student will be able to

- *Understand the meaning, concepts, nature, and functions of education.*
- *Differentiate between narrow and broader concepts of education.*
- *Recognize education as a process, product, and discipline.*
- *Explore the aims of education, including individual, social, and national aims.*
- *Analyze the objectives of education based on the four pillars of education: Learning to Know, Learning to Be, Learning to Do, and Learning to Live Together (Delor's Report).*
- *Comprehend the meaning, concept, nature, scope, and implications of the philosophy of education.*
- *Examine the schools of Indian Philosophy of Education, such as Vedic Schools (Sankhya, Yoga, Naya), Non-Vedic Schools (Charvaka, Buddhist, Jain), and Islamic Philosophy, and understand their educational ideologies and contributions.*
- *Explore the schools of Western Philosophy of Education, including Idealism, Naturalism, and Pragmatism, and their educational ideologies and contributions.*
- *Identify the different forms of education, namely formal, informal, and non-formal education, and understand their meaning, concepts, nature, and importance.*
- *Evaluate the factors of education, including the learner (learner-centered education), the teacher (qualities and responsibilities), the curriculum and co-curricular activities (meaning, modern concept, need, and importance), and educational institutions (roles in education).*
- *Apply educational theories and philosophies to real-world case studies and practical scenarios.*
- *Develop critical thinking and analytical skills based on the concepts, philosophy, forms, and factors of education.*
- *Enhance effective communication and presentation skills, incorporating the concepts, philosophy, forms, and factors of education.*

Module 1: Meaning and Concepts of Education

- Education: Meaning, nature, and functions
- Narrow and broader concepts of education
- Education as a process, product, and discipline

Module 2: Aims of Education

- Aims of education: individual, social, and national aims

- Objectives of education: Learning to Know, Learning to Be, Learning to Do, and Learning to Live Together (Delor's Report)

Module 3: Indian Philosophical Perspectives of Education

- Philosophy of education: Meaning, nature, scope, and implications
- Schools of Indian Philosophy of Education: Vedic Schools (Sankhya, Yoga, Naya), Non-Vedic Schools (Charvaka, Buddhist, Jain), and Islamic Philosophy (*Main Features and Educational Implications only*)

Module 4: Western Philosophical Perspectives of Education

- Schools of Western Philosophy of Education: Idealism, Naturalism, and Pragmatism (*Main Features and Educational Implications only*)
- Epistemological aspects and axiological aspects of Idealism, Naturalism, Marxism, and Pragmatism

Module 5: Forms and Factors of Education

- Forms of education: Formal, informal, and non-formal education
- Factors of education: The learner (learner-centered education), the teacher (qualities and responsibilities), the curriculum and co-curricular activities (meaning, modern concept, need, and importance), and educational institutions (roles in education)

Module 6: Skill Development by Studying Philosophical Aspects

- Case studies and practical applications of educational theories and philosophies
- Fostering analytical and critical understanding of the philosophical concept of western and Indian philosophies (*This module only for Internal Assessment*)

EDCMJ 2: Educational Sociology

Course Objectives

At the end of the course, a student will be able to

- *Understand the meaning of Educational Sociology and Sociology of Education, and their significance in the field of education.*
- *Explore the relationship between Sociology and Education and comprehend how sociological concepts influence educational systems and practices.*
- *Examine the sociological determinants of education and their impact on educational institutions, policies, and outcomes.*
- *Define social change and identify its various dimensions and implications.*
- *Analyze the factors influencing social change, including political, educational, and technological factors.*
- *Explore the concept and forms of social mobility and stratification, and understand their relevance in society.*
- *Differentiate between primary and secondary groups and understand their characteristics and functions.*
- *Recognize the significance of social interaction in education and explore its implications on teaching and learning.*
- *Comprehend the concept of socialization, identify its influencing factors, and evaluate its implications in educational settings.*
- *Define culture and its components, and analyze their influence on education.*
- *Examine the role of education in the preservation and transmission of culture.*
- *Understand the concepts of cultural lag and cultural change and evaluate their impact on education and society.*
- *Investigate the equalization of educational opportunities and understand its importance in addressing social inequalities.*
- *Explore the role of education in solving prevalent social problems such as illiteracy, nutrition and sanitation, superstition & early marriage, etc.*
- *Analyze government policies related to education and their impact on addressing social problems in India.*
- *Apply sociological concepts to real-life case studies in the field of education, fostering practical understanding and application.*
- *Develop critical thinking and analytical skills through the lens of sociological perspectives in education.*
- *Enhance effective communication and presentation skills specifically in the context of sociology and education, facilitating clear articulation of sociological ideas and findings.*

Module 1: Sociology of Education

- Meaning of Educational Sociology
- Meaning of Sociology of Education
- Relationship between Sociology and Education
- Sociological determinants of education

Module 2: Social Change

- Meaning of social change
- Factors affecting social change: Political, Educational, and Technological factors
- Concept and forms of Social Mobility and Stratification

Module 3: Social Group and Socialization

- Types of Groups: Primary Groups and Secondary Groups
- Social interaction and its educational implications
- Socialization: Concept, Factors, and Implications in Education

Module 4: Education and Culture

- Concept and Components of Culture
- Role of education in the preservation and transmission of culture
- Cultural Lag and Cultural Change

Module 5: Current Social Problems in India

- Equalization of Educational opportunities
- Role of Education in solving social problems: Illiteracy, Nutrition and Sanitation, superstition & early marriage, etc.
- Government Policies to resolve these social problems

Module 6: Case Study and Practical Applications

- Students' engagement in social issues such as nutrition, sanitation, superstition & early marriage.
- Critical review of any Government Policy to bring social change (*This module only for Internal Assessment*)

Syllabus

Education

(MINOR COURSE)

EDCMN 1: Philosophical and Sociological Foundation of Education

Learning Objectives: Upon completion of the course, the students will be able to

- *Understand the meaning, concepts, nature, and functions of education.*
- *Explore the aims of education, including individual, social, and national aims.*
- *Analyze the objectives of education based on the four pillars of education: Learning to Know, Learning to Be, Learning to Do, and Learning to Live Together (Delor's Report).*
- *Comprehend the meaning, concept, nature, scope, and implications of the philosophy of education.*
- *Explore the schools of Western Philosophy of Education, including Idealism, Naturalism, and Pragmatism, and their educational ideologies and contributions.*
- *Evaluate the factors of education, including the learner (learner-centered education), the teacher (qualities and responsibilities), the curriculum and co-curricular activities (meaning, modern concept, need, and importance), and educational institutions (roles in education).*
- *Understand the meaning of Educational Sociology and Sociology of Education, and their significance in the field of education.*
- *Explore the relationship between Sociology and Education and comprehend how sociological concepts influence educational systems and practices.*
- *Examine the sociological determinants of education and their impact on educational institutions, policies, and outcomes.*
- *Define social change and identify its various dimensions and implications.*
- *Analyze the factors influencing social change, including political, educational, and technological factors.*
- *Explore the concept and forms of social mobility and stratification, and understand their relevance in society.*
- *Differentiate between primary and secondary groups and understand their characteristics and functions.*
- *Students' participation in social issues*

Module 1: Meaning, Concepts and Factors of Education

- Education: Meaning, nature, and functions
- Aims of education: Individual, social, and national aims
- Objectives of education: Learning to Know, Learning to Be, Learning to Do, and Learning to Live Together (Delor's Report)
- Factors of education: The learner (learner-centered education), the teacher (qualities and responsibilities), the curriculum and co-curricular activities (meaning, modern concept, need, and importance), and educational institutions (roles in education)

Module 2: Philosophy of Education

- Philosophy of education: Meaning, nature, scope, and implications
- Schools of Western Philosophy of Education: Idealism, Naturalism, and Pragmatism.

Module 3: Sociology of Education

- Meaning of Educational Sociology
- Meaning of Sociology of Education
- Relationship between Sociology and Education
- Sociological determinants of education

Module 4: Different Social Processes in our Society

- Meaning and Factors of social change
- Concept and forms of Social Mobility and Stratification
- Meaning and Types of Social Group.

Module 5: Students' participation in social issues

- Social Participation of the learners in the areas of Illiteracy, Nutrition and Sanitation, Unemployment, Corruption, superstition, early marriage in their adjacent areas (*This module only for Internal Assessment*)

Syllabus

Education

(SKILL ENHANCEMENT COURSE)

EDCSEC 1: Differentiated Instruction

Course Objectives:

By the end of this course, participants should be able to:

- *Understand the concept of Differentiated Instruction and its significance in modern education.*
- *Analyze and assess individual student needs and learning styles.*
- *Create and implement differentiated lesson plans to engage and support all learners.*
- *Utilize various instructional methods, materials, and assessment techniques to accommodate diverse learners.*
- *Develop a classroom environment that fosters inclusivity and promotes academic success for all students.*
- *Adapt and modify existing curricula to meet the needs of diverse learners.*
- *Collaborate with colleagues and parents to support differentiated instruction strategies.*
- *Reflect on teaching practices and continuously improve the implementation of differentiated instruction.*

Module 1: Introduction to Differentiated Instruction, Creating Differentiated Lesson Plans

- Understanding the concept and principles of Differentiated Instruction.
- Recognizing the benefits and challenges of implementing differentiated instruction in the classroom.
- Exploring different learning styles and how they impact teaching and learning, Developing flexible lesson plans, Integrating technology and multimedia to support differentiated instruction.

Module 2: Identifying Student Needs

- Conducting student assessments to identify individual learning strengths and challenges.
- Analyzing data to group students based on their learning needs.
- Understanding cultural and socio-economic factors that may affect student learning.

Module 3: Instructional Strategies for Differentiation, and Assessing & Evaluating Differentiated Instruction

- Exploring a range of instructional strategies: tiered assignments, learning centers, flexible grouping, etc.
- Developing formative and summative assessment tools that align with differentiated instruction.

- Analyzing student progress and adjusting instruction accordingly, Addressing challenges in grading and reporting for differentiated classrooms.

Module 4: Classroom Management and Inclusivity

- Establishing an inclusive and positive classroom environment.
- Managing diverse classrooms with varying needs and abilities.
- Promoting a supportive and respectful classroom culture.

Module 5: Collaboration and Professional Development

- Collaborating with colleagues to share best practices and resources.
- Engaging in professional development opportunities related to differentiated instruction.
- Reflecting on personal teaching practices and growth in implementing differentiated instruction.

Semester – II

Syllabus

Education

(MAJOR COURSE)

EDCMJ 3: Educational Psychology

Course Objectives

At the end of the course, a student will be able to

- *Understand the meaning, nature, scope, methods, and applications of Educational Psychology in the teaching-learning process.*
- *Explore the relationship between Psychology and Education and comprehend how psychological principles contribute to effective teaching and learning.*
- *Define sensation and perception, and analyze their meaning, nature, and types.*
- *Examine the process of concept formation, its meaning, nature, and various types.*
- *Understand the concept of memory, its meaning, nature, and different types.*
- *Identify the causes of forgetting and explore strategies for memory improvement.*
- *Define growth and development, and understand their meaning, nature, and underlying principles.*
- *Explore the stages of development, focusing on infancy, childhood, and adolescence.*
- *Examine cognitive development based on Piaget's theory.*
- *Analyze individual differences in terms of their meaning, types, causes, areas, and the role of teachers in minimizing these differences in the classroom.*
- *Define learning, understand its meaning, and analyze the factors influencing learning. Explore various theories of learning, including Pavlov, Skinner, Thorndike, and Gestalt Theory, and their applications.*
- *Examine the relationship between learning and maturation, attention, interest, and motivation.*
- *Explore the concept of transfer of learning, its meaning, types, and relevant theories.*
- *Understand the meaning of creativity, its nature, factors that influence it, and explore strategies for nurturing and measuring creativity.*
- *Define intelligence, understand its meaning, and explore various theories of intelligence, including Spearman, Thurstone, and Guilford. Analyze their educational significance.*
- *Examine the types of intelligence tests, such as Binet and Wechsler, and understand their uses.*
- *Define personality, and explore its meaning, nature, and development. Study various theories of personality, including the trait theory by Allport and the type theory by Jung.*
- *Analyze projective tests as a method of measuring personality.*
- *Apply the principles of educational psychology to real-life case studies in the teaching-learning process, fostering practical understanding and application.*
- *Develop critical thinking and analytical skills based on educational psychology concepts.*
- *Enhance effective communication and presentation skills specifically in educational settings, facilitating clear articulation of educational psychology ideas and findings.*

Module 1: Introduction to Educational Psychology

- Meaning, Nature, Scope, Methods, and Applications of Educational Psychology in the teaching-learning process
- Relationship between Psychology and Education

Module 2: Sensation, Perception, Concept Formation, Memory & Forgetting

- Sensation and Perception: Meaning, Nature, and Types
- Concept Formation: Meaning, Nature, and Types
- Memory: Meaning, Nature, and Types
- Forgetting: Causes and Strategies for memory improvement

Module 3: Growth and Development

- Growth and Development: Meaning, Nature, and Principles
- Stages of development: Infancy, Childhood, and Adolescence
- Cognitive development (Piaget's theory)
- Individual Differences: Meaning, Types, Causes, Areas, and the Role of teachers in nurturing individual differences in the classroom

Module 4: Learning and Creativity

- Learning: Meaning, Nature, Factors, and Theories (Pavlov, Skinner, Thorndike, Gestalt Theory) and their applications
- Relation of learning with Maturation, Attention, Interest, and Motivation
- Transfer of Learning: Meaning, Types, and Theories
- Creativity: Meaning, Nature, Factors, Nurturing, and Measurement of Creativity

Module 5: Intelligence and Personality

- Intelligence: Meaning, Nature, and Theories (Spearman, Thurstone, Guilford) and their educational significance
- Measurement of Intelligence: Types of Tests (Binet and Wechsler) and their uses
- Personality: Meaning, Nature, Development, and Theories (Trait theory - Allport, Type theory - Jung)
- Measurement of Personality: Projective Tests

Module 6: Skill Development of Students to deal with Psychological issues

- Compose a story on a given picture (*Projective Test of Personality*) (***This module only for Internal Assessment***)

EDCMJ 4: History of Education in India

Course Objectives

At the end of the course, a student will be able to

- *Analyze the aims, structure, curriculum, methods, and discipline of education during the Vedic period.*
- *Evaluate the aims, structure, curriculum, methods, and discipline of education during the Buddhist period.*
- *Assess the contributions and teacher-student relationships in ancient Indian education.*
- *Examine the aims of education, structure, curriculum, methods, discipline, teacher-student relationships, and contributions during the medieval period in India.*
- *Evaluate the educational activities of Firoj Shah, Great Akbar, and Aurangzeb and their impact on education.*
- *Analyze the educational initiatives during British India, including the activities of missionaries towards education.*
- *Understand the significance of key educational reports and acts, such as Adams Report, Charter Act, Macaulay's Minutes, Wood's Dispatch, Hunter Commission, Gokhale's Bill, and Calcutta University Commission.*
- *Gain an overview of the University Education Commission, Secondary Education Commission, and Indian Education Commission.*
- *Examine the views and recommendations of each commission on different aspects of education.*
- *Analyze the impact of these commissions on the education system in India.*
- *Understand the key features and objectives of each National Education Policy.*
- *Evaluate the impact of these policies on the education landscape in India.*
- *Identify the challenges and successes in implementing the policies.*
- *Discuss the implications of the commission's recommendations on education.*
- *Gain an overview of the Right to Education Act, including its objectives, provisions, and implications.*
- *Analyze the key features and provisions of the National Education Policy - 2020.*
- *Discuss the relevance and significance of these acts and policies in shaping the education system.*

Module 1: Education in Ancient India

- Vedic Period: Aims, Structure, Curriculum, Methods, Discipline, Teacher-Student relation, and contribution
- Buddhist Period: Aims, Structure, Curriculum, Methods, Discipline, Teacher-Student Relation, and Contribution

Module 2: Education in Medieval India

- Medieval Period: Aims of education, Structure, Curriculum, Methods, Discipline, Teacher-Student relation, and contribution
- Educational activities of Firoj Shah, Akbar, and Aurangzeb

Module 3: Education in Pre-Independent India

- Education in British India: Missionaries' activities towards education
- Adams Report, Charter Act, Macaulay's Minutes, Wood's Dispatch, Hunter Commission, Gokhale's Bill, Calcutta University Commission
- National Education Movements: Features, causes, phases, and failures

Module 4: Introduction to Education Commissions and Policies

- Overview of University Education Commission, Secondary Education Commission, and Indian Education Commission
- Examination of the views and recommendations of each commission on different aspects of education
- Analysis of the impact of these commissions on the education system in India

Module 5: National Education Policy (1986, 1992-POA, RTE -2009, & NEP -2020)

- Understanding the key features and objectives of each National Education Policy
- Evaluation of the impact of these policies on the educational landscape in India
- Overview of the Right to Education Act 2009, including its objectives, provisions, and implications
- Analysis of the key features and provisions of the National Education Policy - 2020

Module 6: Development Skill & Critical Thinking

- Review of any one area of NEP -2020 and report the same (*This module only for Internal Assessment*)

Syllabus

Education

(MINOR COURSE)

EDCMN 2: Introduction to Educational Psychology

Learning Objectives: Upon completion of the course, the students will be able to

- *Understand the meaning, nature, scope, methods, and applications of Educational Psychology in the teaching-learning process.*
- *Explore the relationship between Psychology and Education and comprehend how psychological principles contribute to effective teaching and learning.*
- *Understand the concept of memory, its process and ways of nurturing*
- *Define growth and development, and understand their meaning, nature, and underlying principles.*
- *Explore the stages of development, focusing on infancy, childhood, and adolescence.*
- *Examine cognitive development based on Piaget's theory.*
- *Define learning, understand its meaning, and analyze the factors influencing learning. Explore various theories of learning, including Pavlov, Skinner, Thorndike, and Gestalt Theory, and their applications.*
- *Examine the relationship between learning and maturation, attention, interest, and motivation.*
- *Understand the meaning of creativity, its nature, factors that influence it, and explore strategies for nurturing and measuring creativity.*
- *Define intelligence, understand its meaning, and explore various theories of intelligence, including Spearman, Thurstone, and Gardner. Analyze their educational significance.*
- *Define personality, and explore its meaning, nature, and development. Study various theories of personality, including the trait theory by Allport and the type theory by Jung.*
- *Analyze projective tests as a method of measuring personality.*

Module 1: Basics of Educational Psychology

- Meaning, Nature, Scope, Methods
- Relationship between Psychology and Education
- Application of Educational Psychology in Teaching-Learning process

Module 2: Growth and Development

- Growth and Development: Meaning, Nature, and Principles
- Stages of development: Infancy, Childhood, and Adolescence (physical, cognitive, social & emotional perspective)
- Cognitive development (Piaget's theory)

Module 3: Learning and Creativity

- Learning: Meaning, Nature, Factors, and Theories (Pavlov, Skinner, Thorndike, Gestalt Theory) and their educational implication
- Relation of learning with Maturation, Attention, Interest, and Motivation
- Creativity: Meaning, Nature, Factors, Nurturing, and Measurement of Creativity
- Memory – process and ways to nurture

Module 4: Intelligence and Personality

- Intelligence: Meaning, Nature, and Theories (Spearman, Thurstone, Gardner) and their educational significance
- Measurement of Intelligence: Types of Tests (Binet and Wechsler) and their uses
- Personality: Meaning, Nature, Development, and Theories (Trait theory - Allport, Type theory - Jung)
- Measurement of Personality: (Projective Tests only)

Module 5: Measurements of Multiple Intelligences of two people and reporting the same (This module only for Internal Assessment)

Syllabus

Education

(SKILL ENHANCEMENT COURSE)

EDCSEC 2: COMMUNICATION SKILLS

Learning objectives:

Upon completion of this course, the students will be able to:

- *Interact effectively with peers, teachers, and community people*
- *Develop interview skills*
- *Acquire abilities to convey thought properly in verbal and non-verbal mode*
- *Enhancing critical thinking abilities*
- *Acquiring communication proficiency*
- *Summarize and synthesize complex information effectively*
- *To develop questioning and analyzing abilities*
- *Drawing logical conclusion and make inferences based on information received*
- *To enhance inter and intra-personal relationship*
- *To improve the retention of information by implementing memory enhancing strategies*

Course content

UNIT – I: Communication Skills

- Introduction, Definition, Importance of Communication skill, 7C's for effective communication, Barriers to Communication – Physiological Barriers, Physical Barriers, Cultural Barriers, Language Barriers, Gender Barriers, Interpersonal Barriers, Psychological Barriers, Emotional barriers.

UNIT – II: Elements of Communication

- Introduction, Face to Face Communication – Verbal & Non-Verbal (Tone of voice, body language, gesture, posture, eye-contact, voice modulation, intonation).

UNIT – III: Skills for Communication

- **Speaking Skill:** Elements of speaking skill, Strategies to augment speaking skill, public speaking – (Extempore, Debate, Group Discussion), Do's and Don'ts of Group Discussion.

- **Listening Skill:** Elements of listening skill, Strategies to augment listening skill, Active listening, Becoming an active listener, Listening in difficult situations.
- **Writing Skill:** Elements of writing skill, Strategies to develop writing skill, When and When not to use written communication – Complexity of the Topic, Amount of discussion required, Shades of meaning,

UNIT – IV: Interview Skills

- Purpose of an interview, Do's and Don'ts of an interview, Dealing with interview-anxiety, Planning your Presentation, Structuring your Presentation, Delivering your Presentation, Techniques of delivery.

- Bringing out the Best in People, Aubrey Daniels, 2nd Edition, Mc Graw Hill, 1999

Semester – III

Syllabus

Education

(MAJOR COURSE)

EDCMJ 5: Great Educators

Course Objectives

At the end of the course, a student will be able to

- *Examine the educational thoughts and philosophy of Mahatma Gandhi and understand his contributions to Indian education.*
- *Critically study Swami Vivekananda's educational ideas and principles and analyze his influence on Indian education.*
- *Explore Rabindranath Tagore's educational philosophy and pedagogical approaches and evaluate his impact on Indian education.*
- *Analyze Sri Aurobindo's vision of integral education and understand his contributions to Indian educational thought.*
- *Conduct a critical examination of Jean-Jacques Rousseau's educational ideas and principles and assess his influence on Indian education.*
- *Analyze John Dewey's pragmatic philosophy of education and evaluate his contributions to Indian educational practices.*
- *Study Maria Montessori's educational philosophy and methodology and assess her impact on Indian education.*
- *Understand Friedrich Froebel's kindergarten system and educational concepts and evaluate his contributions to Indian early childhood education.*

Module 1: Educational Thinkers of East

i. M. K. Gandhi

- Examining the Educational Thoughts and Philosophy of Mahatma Gandhi
- Understanding His Contributions to Indian Education

ii. Swami Vivekananda

- Critical Study of Swami Vivekananda's Educational Ideas and Principles
- Analyzing His Influence on Indian Education

iii. Rabindranath Tagore

- Exploring Rabindranath Tagore's Educational Philosophy and Pedagogical Approaches
- Evaluating His Impact on Indian Education

iv. Sri Aurobindo

- Analyzing Sri Aurobindo's Vision of Integral Education
- Understanding His Contributions to Indian Educational Thought

Module 2: Educational Thinkers of West

i. Rousseau

- Critical Examination of Jean-Jacques Rousseau's Educational Ideas and Principles
- Assessing His Influence on Education

ii. John Dewey

- Analyzing John Dewey's Pragmatic Philosophy of Education
- Evaluating His Contributions to Educational Practices

iii. Montessori

- Studying Maria Montessori's Educational Philosophy and Methodology
- Assessing Her Impact on Education

iv. Froebel

- Understanding Friedrich Froebel's Kindergarten System and Educational Concepts
- Evaluating His Contributions to Early Childhood Education

Module 3: Analytical and Critical Thinking

- Analytical report of the application of Play-way method in a Pre-Primary School (*This module only for Internal Assessment*)

References

- Sharma, R. (2022). Swami Vivekananda: Critical Study of His Educational Ideas and Principles. McGraw-Hill Education – India.
- Dasgupta, N. (2021). Rabindranath Tagore: Exploring His Educational Philosophy and Pedagogical Approaches. Oxford University Press – India.
- Chatterjee, P. (2020). Sri Aurobindo: Analyzing His Vision of Integral Education. Pearson Education – India.
- Gupta, S. (2022). John Dewey: Analyzing His Pragmatic Philosophy of Education. Pearson Education – India.
- Sharma, R. (2021). Montessori: Studying Maria Montessori's Educational Philosophy and Methodology. McGraw-Hill Education – India.
- Dasgupta, N. (2020). Froebel: Understanding Friedrich Froebel's Kindergarten System and Educational Concepts. Oxford University Press – India.

EDCMJ 6: Educational Measurement and Evaluation

Course Objectives

At the end of the course, a student will be able to

- *Understand the meaning and nature of educational measurement.*
- *Recognize the need for measurement in education.*
- *Comprehend the concept and nature of assessment and evaluation in education.*
- *Analyze the relationship between measurement, assessment, and evaluation.*
- *Identify and classify different types of evaluation, including placement, formative, diagnostic, summative, norm-Referenced, and criterion-Referenced evaluation.*
- *Explain the purpose, characteristics, and implementation of each type of evaluation.*
- *Classify measuring instruments used in educational measurement.*
- *Identify and understand errors in measurement and their impact.*
- *Evaluate different types of scales used in educational measurement.*
- *Describe the characteristics of a good measuring instrument, including validity, reliability, norms, and objectivity.*
- *Measure interest, intelligence, aptitude, attitude, personality, and academic achievement using appropriate tools and techniques.*
- *Evaluate the strengths and limitations of various measurement instruments for each construct.*
- *Apply general principles of test construction to develop valid and reliable tests.*
- *Implement standardization procedures in test development.*
- *Utilize appropriate scoring methods for student achievement tests.*
- *Interpret test scores using relevant methods.*
- *Report test results for different types of tests, including essay type, objective type, short answer type, and oral type tests.*
- *Recognize the significance of test result reporting.*
- *Communicate test scores effectively to various stakeholders.*
- *Apply knowledge and skills gained in measurement and evaluation to practical situations.*
- *Demonstrate proficiency in test construction, data analysis, and interpretation.*
- *Develop and present a comprehensive capstone project related to measurement and evaluation in education.*

Module 1: Introduction to Measurement and Evaluation

- Meaning and nature of educational measurement
- The need for measurement in education
- Concept and nature of assessment and evaluation in education
- Understanding the relationship between measurement, assessment, and evaluation

Module 2: Types of Evaluation

- Overview of different types of evaluation, including placement, formative, diagnostic, summative, norm-Referenced, and criterion-Referenced evaluation
- Examination of the purpose, characteristics, and implementation of each type of evaluation

Module 3: Measurement Instruments

- Classification of measuring instruments
- Types of scales in educational measurement
- Characteristics of a good measuring instrument, including validity, reliability, norms, and objectivity

Module 4: Measurement of Various Constructs

- Measurement of interest, intelligence, aptitude, attitude, personality, and academic achievement
- Introduction to different tools and techniques used to measure each construct
- Understanding the strengths and limitations of various measurement instruments

Module 5: Test Construction and Standardization

- General principles of test construction
- Standardization procedures in test development
- Scoring methods for student achievement tests
- Methods of interpreting test scores

Module 6: Developing a test & Reporting Test Results

- Reporting test results for different types of tests, including essay type, objective type, short answer type, and oral type tests
- Develop an objective type test of 20 marks for a subject of higher secondary level (***This module only for Internal Assessment***)

Syllabus

Education

(MINOR COURSE)

EDCMN 3: History of Indian Education and Great Indian Educators

Learning Objectives: Upon completion of the course, the students will be able to

- *Analyze the educational initiatives during British India, including the activities of missionaries towards education.*
- *Understand the significance of key educational reports and acts, such as Adams Report, Charter Act, Macaulay's Minutes, Wood's Dispatch, Hunter Commission, Gokhale's Bill, and Calcutta University Commission.*
- *Gain an overview of the University Education Commission, Secondary Education Commission, and Indian Education Commission.*
- *Examine the views and recommendations of each commission on different aspects of education.*
- *Analyze the impact of these commissions on the education system in India.*
- *Understand the key features and objectives of each National Education Policy.*
- *Evaluate the impact of these policies on the education landscape in India.*
- *Identify the challenges and successes in implementing the policies.*
- *Discuss the relevance and significance of these acts and policies in shaping the education system.*
- *Examine the educational thoughts and philosophy of Mahatma Gandhi and understand his contributions to Indian education.*
- *Critically study Swami Vivekananda's educational ideas and principles and analyze his influence on Indian education.*
- *Explore Rabindranath Tagore's educational philosophy and pedagogical approaches and evaluate his impact on Indian education.*
- *Analyze Sri Aurobindo's vision of integral education and understand his contributions to Indian educational thought.*

Module 1: Education in India

Pre-independent

- Education in British India: Missionaries' activities towards education
- Adams Report, Charter Act, Macaulay's Minutes, Wood's Dispatch

Post-independent

- Overview of University Education Commission, Secondary Education Commission, and Indian Education Commission

Module 2: National Education Policy (1986, 1992-POA and 2020)

- Understanding the key features and objectives of each National Education Policy
- Evaluation of the impact of these policies on the education landscape in India
- Identification of the challenges and successes in implementing the policies

Module: 3 M. K. Gandhi and Swami Vivekananda

- Examining the Educational Thoughts and Philosophy of Mahatma Gandhi
- Understanding His Contributions to Indian Education
- Critical Study of Swami Vivekananda's Educational Ideas and Principles
- Analyzing His Influence on Indian Education

Module 4: Rabindranath Tagore and Sri Aurobindo

- Exploring Rabindranath Tagore's Educational Philosophy and Pedagogical Approaches
- Evaluating His Impact on Indian Education
- Analyzing Sri Aurobindo's Vision of Integral Education
- Understanding His Contributions to Indian Educational Thought

Module 5: Review and Reporting

- Review of any one area of NEP -2020 and National Higher Education Quality Framework (NHEQF) & report the same (*This module only for Internal Assessment*)

Suggested Readings:

1. পাল, ধর, দাশ, ব্যানার্জি, (২০২০) শিক্ষার ভিত্তি ও বিকাশ, রিতা বুক এজেন্সি, কলকাতা, পঃ বঃ.
2. রায়, সুশিল,(২০২২), শিক্ষাতত্ত, সোমা বুক এজেন্সি, কলকাতা, পঃ বঃ.
3. রায়, সুশিল, (২০০৫), ভারতের শিক্ষা ও শিক্ষার ভারতায়ন, সোমা বুক এজেন্সি, কলকাতা, পঃ বঃ.
4. Kumar, R. (2019). National Education Policy 2020: Vision, Implementation, and Impact. Springer – Singapore
5. Sharma, R. (2022). Swami Vivekananda: Critical Study of His Educational Ideas and Principles. McGraw-Hill Education – India.
6. Verma, S. (2018). Indian National Education Policy: Issues, Challenges, and Prospects. PHI Learning – New Delhi (India)
7. Dasgupta, N. (2021). Rabindranath Tagore: Exploring His Educational Philosophy and Pedagogical Approaches. Oxford University Press – India. 17
8. Chatterjee, P. (2020). Sri Aurobindo: Analyzing His Vision of Integral Education. Pearson Education – India.

Syllabus

Education

(SKILL ENHANCEMENT COURSE)

EDCSEC 3: Digital Skills

Learning Objectives:

- *To acquire a comprehensive understanding of digital tools, platforms, and technologies*
- *Understand the literature of social networks and their properties*
- *To develop skills of choosing the right digital platform to fulfil educational need*
- *To develop skills to use various social networking sites like twitter, Facebook, etc.*
- *To get oriented with GOI digital initiatives in education*
- *Apply skills to use online forums, docs, spreadsheets etc. for communication, collaboration, and research*
- *Get acquainted with internet threats and security mechanisms*
- *Understand the digital world and need for digital empowerment*
- *To explore, communicate, and collaborate in cyberspace*
- *To understand the importance of digital privacy*
- *To acquire the skills of responsible and ethical behaviour in digital realm*
- *To leverage digital skills for employment opportunities and entrepreneurship*

UNIT-I: Fundamentals of Internet

- What is Internet? Internet applications, Internet Addressing — Entering a Web Site Address, URL, Searching the Internet, Browser, Digital signatures, Social Networking (Twitter, LinkedIn, Facebook, Skype, YouTube, WhatsApp, and Blog).

UNIT-II: E-mailing

- Definition of E-mail, Advantages and Disadvantages, User Ids, Passwords, Email Addresses, Domain Names, Mailers, Message Components, Message Composition, Mail Management, G-Suite (Google Meet, Google drive, Google documents, Google spread sheets, Google slides and Google forms).

UNIT-III: Digital Empowerment

- Needs and challenges, Vision of Digital India: Digi Locker, SWAYAM, Swayam Prabha, National Academic Depository, National Digital Library, e-Pathshala, e-Shodh-Ganga, e-Sodh-Sindhu, Virtual Labs, NPTEL, INFLIBNET, Academic Bank of Credit.

UNIT-IV: Towards Safe Cyberspace & Ethical Issues in Digital World

- Overview of Internet security and privacy, Threats in the digital world, Data breach and Cyber-attacks, Virus and antivirus software, Security initiatives by the Govt. of India, Netiquettes, Ethics in digital communication, Ethics in Cyberspace.

SUGGESTED READING:

- In-line/On-line: Fundamentals of the Internet and the World Wide Web, 2/e by Raymond Greenlaw and Ellen Hepp, Publishers: TMH
- Internet technology and Web design, ISRD group, TMH.
- Information Technology — The breaking wave, Dennis P. Curtin, Kim Foley, Kunai Sen and Cathleen Morin, TMH.
- Rodney Jones and Christoph Hafner. "Understanding digital literacies: A practical Introduction". Routledge Books, 2nd edition, 2021.
- David Sutton. "Cyber security: A practitioner's guide", BCS Learning & Development Limited, UK, 2017.

Semester – IV

Syllabus

Education

(MAJOR COURSE)

EDCMJ 7: Educational Management and Leadership

Course Objectives

At the end of the course, a student will be able to

- *Understand the meaning, concept, and nature of educational management and its role in education.*
- *Recognize the importance of educational management in skill development and its impact on educational institutions.*
- *Identify and understand the key functions of educational managers and how these functions contribute to effective management in education.*
- *Differentiate between centralized and decentralized management approaches and comprehend their implications for educational institutions.*
- *Analyze authoritarian and democratic management styles, including their characteristics, pros, and cons, and apply them in educational settings.*
- *Understand dynamic and laissez-faire management approaches and determine the suitable management style based on situational factors in education.*
- *Define and conceptualize educational supervision and recognize its role in enhancing learning and teaching.*
- *Differentiate between management and administration in the educational context and identify the functions and responsibilities of educational administrators.*
- *Understand the purpose and scope of educational inspections and their contribution to quality improvement in educational institutions.*
- *Recognize the significance of leadership in educational management and its relationship with skill development.*
- *Identify the characteristics and qualities of effective educational leaders and understand their impact on educational institutions.*
- *Analyze different leadership styles found in educational settings and adapt them to specific educational situations.*
- *Understand the importance of student welfare services for holistic development.*
- *Create a positive institutional climate to enhance learning and implement strategies for maintaining discipline and order in schools.*
- *Manage finances and budget allocation efficiently, ensuring optimal use of financial resources for skill development.*
- *Understand the meaning, types, and significance of educational planning and its importance for educational institutions.*
- *Develop a well-structured academic calendar and create an efficient timetable to facilitate optimal learning and teaching.*

Module 1: Introduction to Educational Management

- Educational Management: Meaning, Concept, and Nature, Understanding the role of Management in Education, Importance of Educational Management in skill development
- Scope and Functions of Educational Management, Identifying the areas where Management is crucial in Education, Addressing the necessity of effective Educational Management

Module 2: Types of Educational Management

- Centralized and Decentralized Management, Differences between Centralized and Decentralized Approaches, Implications of each Management type on Educational Institutions
- Authoritarian and Democratic Management, Characteristics and Pros/Cons of Authoritarian and Democratic Leadership, Application of Leadership Styles in Educational Settings
- Dynamic and Laissez-Faire Management, Understanding Dynamic and Laissez-Faire Management Approaches, Choosing the Right Management Style based on situational factors

Module 3: Supervision, Administration, and Inspection

- Supervision in Education, Definition and Concept of Educational Supervision, The Role of Supervision in enhancing learning and teaching
- Administration in educational context, Differentiating between Management and Administration, Functions and Responsibilities of Educational Administrators
- Inspection in Educational Institutions, Purpose and Scope of Educational Inspections, How Inspections contribute to quality improvement

Module 4: Leadership in Education

- Leadership in Educational Management, Understanding the Significance of Leadership in Education, The relationship between leadership and skill development
- Characteristics of an Effective Educational Leader, Identifying traits and qualities of successful educational leaders, how these characteristics impact educational institutions
- Types of Leaders in Education, Analyzing different leadership styles found in educational settings, adapting leadership styles to specific educational situations

Module 5: Aspects of Educational Management

- Student Welfare and Auxiliary Services, Importance of Student Welfare Services for Holistic Development
- School Plant and Infrastructure Management, Effective Handling of School Equipment, Assets, and Facilities
- Institutional Climate and Discipline, Creating a Positive Institutional Climate to Enhance Learning, Strategies for Maintaining Discipline and Order in Schools
- Management of Finance and Budget Allocation, Financial Planning and Resource Allocation in Educational Institutions

Module 6: Educational Planning and Time- tabling

- Educational Planning: Meaning, Types, and Significance, Importance of Systematic Planning for Educational Institutions, Long-term and Short-term Planning Strategies
- Steps in Educational Planning, The Process of Developing an Effective Educational Plan
- Preparation of Academic Calender / Time -Table for a semester at under Graduate level (*This module only for Internal Assessment*)

EDCMJ 8: Educational Statistics and Data Analysis

Course Objectives

At the end of the course, a student will be able to

- *Understand the concept of statistics in the context of education, including its definition, scope, and importance.*
- *Identify and analyze different sources of educational data and recognize the role of educational statistics in data analysis.*
- *Recognize the significance of statistics in education and its influence on decision-making through real-world examples.*
- *Comprehend the concept of variables and data in educational research and understand the types of variables and their uses.*
- *Create and interpret graphical representations of data, including pie diagrams, histograms, frequency polygons, and cumulative frequency graphs.*
- *Construct and apply frequency distributions to present and analyze data effectively.*
- *Understand the purpose and definition of measures of central tendency and their role in analyzing educational data.*
- *Calculate and apply the mean, median, and mode as measures of central tendency in educational contexts.*
- *Interpret the values of central tendency measures and their implications in education.*
- *Recognize the importance of measures of variability in educational data analysis and their implications for skill development.*
- *Compute and utilize measures such as range, quartile deviation, average deviation, and standard deviation in educational research.*
- *Understand the limitations and interpretation of variability measures in education.*
- *Explain the concept of normal distribution and its properties in educational statistics.*
- *Identify and analyze deviations from normality, including skewness and kurtosis, and their implications.*
- *Calculate and interpret derived scores such as z-score, t-score, and stannine, and understand their usage in educational research.*
- *Understand the concept of bivariate distribution and correlation in educational statistics.*
- *Compute correlation coefficients using the rank difference method and product moment method.*
- *Interpret correlation coefficients to determine the strength and direction of relationships in educational data.*

Module 1: Introduction to Educational Statistics

- Understanding the Concept of Statistics: Definition and Scope of Educational Statistics; and Application of educational statistics in Skill Development
- Sources of Educational Data: Types of Data Sources in Educational Context.

Module 2: Data Collection and Presentation

- Concept of Variables and Data: Definition and Types of Variables in Educational Research; Types of Data (Grouped and Ungrouped) and Their Uses
- Graphical Presentation of Data: Pie Diagrams: Construction and Interpretation, Histograms: Creating and Analyzing Frequency Distributions, Frequency Polygon: Plotting and Utilizing Data, Cumulative Frequency Graph and Ogive: Construction and Application

Module 3: Measures of Central Tendency

- Introduction to Central Tendency: Definition and Purpose of Measures of Central Tendency, Role in Analyzing Educational Data
- Calculation and Application of Mean, Median, and Mode: Understanding How to Compute Each Measure, Interpreting Central Tendency Values in Education

Module 4: Measures of Variability

- Importance of Variability Measures: The Role of Variability in Educational Data Analysis
- Range, Quartile Deviation, and Average Deviation, Computation and Usage of Each Measure in Education, Understanding Limitations and Interpretation
- Standard Deviation: Calculating Standard Deviation and its Significance

Module 5: Normal Distribution and Derived Scores

- Concept of Normal Distribution: Properties and Characteristics of Normal Probability Curve, Interpreting Test Scores Using Normal Distribution
- Divergence from Normality: Skewness and Kurtosis: Identifying and Analyzing Skewed and Kurtotic Distributions
- Derived Scores: Z-Score, T-Score, and Stannine: Understanding How to Calculate and Use Derived Scores, Percentile Point and Percentile Rank
- Reporting the nature of given data sets as per the parameters of normality (**This Bullet only for Internal Assessment**)

Module 6: Bivariate Distribution and Correlation

- Introduction to Bivariate Distribution: Definition and Concept of Correlation in Educational Statistics, Types of Correlation and Their Applications
- Computation of Correlation Coefficients: Rank Difference Method for Correlation Calculation, Product Moment Method for Correlation Calculation, Interpretation of Correlation Coefficients,

EDCMJ 9: Technological Exploration for Education

Course Objectives

At the end of the course, a student will be able to

- *Understand the meaning, concept, and nature of educational technology and its role in education.*
- *Recognize the importance of educational technology in skill development and its impact on teaching and learning.*
- *Identify the scope and areas where technology enhances teaching and learning and the necessity of effective integration of technology.*
- *Explore the key functions of educational technology and understand how technology supports learning outcomes.*
- *Understand the role of audio-based technology in education, such as radio and tape, and the applications and benefits of audio-based instruction.*
- *Explore visual-based technology, including projectors, and effectively use visuals to enhance learning experiences.*
- *Utilize audio-visual technology, such as TV and CCTV, and integrate audio-visual resources for engaging instruction.*
- *Understand the relationship between communication and educational technology and how technology enhances communication in educational settings.*
- *Identify the components of the communication process and their role in the teaching-learning process.*
- *Recognize factors affecting classroom communication and develop strategies to overcome communication barriers in the classroom.*
- *Utilize audio-based media, such as radio and tape, in instructional settings and understand the advantages and limitations of audio media in education.*
- *Effectively use visual-based media, including projectors, for visual instruction and consider the benefits and considerations of visual media in education.*
- *Integrate audio-visual media, such as TV and CCTV, for engaging instruction and enhance learning experiences through audio-visual resources.*
- *Understand mass instructional techniques such as the lecture method, seminar method, and demonstration method, including their nature, advantages, limitations, and effectiveness.*

Module 1: Introduction to Educational Technology

- Educational Technology: Meaning, Concept, and Nature, Understanding the Role of Technology in Education, Artificial Intelligence – its application in teaching learning
- Scope and Need for Educational Technology, Addressing the Necessity of Effective Integration of Technology
- Functions of Educational Technology, Exploring the Key Functions of Educational Technology, How Technology Supports Learning Outcomes

Module 2: Types of Educational Technology

- ET-1: Audio-Based Technology, Understanding the Role of Audio Tools in Education (e.g., Radio, Tape), Applications, Benefits, and limitations of Audio-Based Instruction
- ET-2: Visual-Based Technology, Exploring Visual Media and Tools in Education (e.g., Projector), Effective Use of Visuals for Enhancing Learning Experiences, Applications, Benefits, and limitations of Visual-Based Technology
- ET-3: Audio-Visual Technology, Utilizing Audio-Visual Tools in Education (e.g., TV, CCTV), Integration of Audio-Visual Resources for Engaging Instruction, Applications, Benefits, and limitations of Audio-Visual Technology

Module 3: Communication in Education

- Communication and Educational Technology, Understanding the Relationship Between Communication and Technology, How Technology Enhances Communication in Educational Settings
- Components of the Communication Process, Exploring the Elements of Effective Communication, Role of Each Component in the Teaching-Learning Process
- Factors Affecting Classroom Communication, Identifying Influential Factors in Effective Communication, Strategies for Overcoming Communication Barriers in the Classroom

Module 4: Instructional Techniques

- Mass Instructional Techniques, Lecture Method: Nature, Advantages, and Limitations, Seminar Method: Meaning, Benefits, and Considerations, Demonstration Method: Role, Effectiveness, and Constraints

- Personalized Techniques, Programmed Learning: Definition, Features, and Benefits, Computer-Assisted Instruction: Applications and Advantages, Microteaching: Nature, Significance, and Challenges

Module 5: Open and Distance Learning

- Open and Distance Education: Meaning and Concepts, Understanding the Basics of Open and Distance Learning, Nature, Scope, and Usefulness in Skill Development
- Application of Educational Technology in Distance Education, Integrating Technological Tools for Effective Distance Learning, Benefits and Challenges of Using Educational Technology in Distance Education

Module 6: Application based activity

- Demonstration of a Topic with PPT. (*This module only for Internal Assessment*)

Syllabus

Education

(MINOR COURSE)

EDCMN 4: Curriculum Design and Co-Curricular Activities

Learning Objectives: Upon completion of the course, the students will be able to

- *Understand the principles and theories of curriculum design and assessment in education.*
- *Analyze and evaluate existing curricula to identify strengths and areas for improvement.*
- *Develop curriculum frameworks that align with educational objectives and standards.*
- *Design engaging and meaningful learning experiences and instructional strategies.*
- *Create formative and summative assessment tools to measure student learning.*
- *Implement effective assessment strategies to monitor and evaluate student progress.*
- *Use technology and multimedia resources to enhance curriculum design and assessment.*
- *Adapt curriculum and assessment approaches to meet diverse learner needs.*
- *Collaborate with colleagues to develop and refine curriculum and assessment practices.*
- *Evaluate and reflect on curriculum design and assessment practices for continuous improvement.*

Module -1: Introduction to Curriculum Design & Assessment

- Curriculum: Concept, Types
- Overview of curriculum design, its concepts and processes
- Principles of curriculum design
- Assessing strengths and weaknesses of current curricula

Module -2: Curriculum Framework Development

- Identifying educational goals, standards, and outcomes
- Developing a curriculum vision and philosophy
- Designing a comprehensive curriculum framework

Module -3: Co-Curricular Activities

- Meaning, Types, objectives, importance
- How to organize co-curricular activities in educational institutions
- Management and planning of events

Module -4: Assessment of Curriculum

- Formative Assessment: Meaning, objectives, importance
- Summative Assessment: Meaning, objectives, importance

Module -5: For Internal Assessment

- Students' individual engagement in any one co-curricular activity and reporting the same with authentic documents.
